TOOL 工具

INSIDE PRODUCTS 整組產品內容

STEPS 步驟

1. Pass the brake inner cable through.

將剎車內線穿過手把端。

2. Use the cable cutter to cut the outer casing to the necessary length for each section.

使用外殼導管專用剪刀，裁切每段實際需求長度。
(外殼導管長度建議參考原有車上組裝的長度)

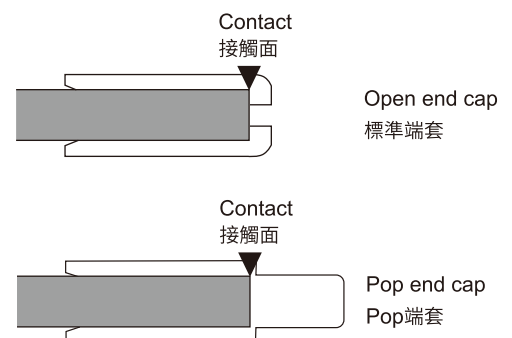

3. After cutting, use the cable cutter to correct the distortion of the outer casing. And install end caps.

裁切完畢，請使用外殼導管專用剪刀整圓處，將外殼導管因裁切擠壓變形端重新整圓，以利使用順暢；然後再安裝端套。

Make sure that the outer casing is rounded after cutting.

外殼導管裁切後，請確實使用剪刀整圓處再次整圓外殼導管，確保動作順暢。

If the end cap is not securely installed to the outer casing, the outer casing might not operate properly.

若外殼導管沒有完全裝到端套底部，則會影響作動。

4. Pass the brake inner cable through EZ-Bend segment.

將剎車內線穿過銜接外殼導管的公路車把手專用外殼導管連結彎管。

5. Between the cable stops add the mini tube tops and cable o-rings.

將防止摩擦車架的保護套、內線防刮墊圈組裝於適切的位置。

6. Pass the inner cable through brake and seat outer casing using POP end cap.

先將POP端套組裝到外殼導管，再將內線穿過已組裝POP端套的外殼導管和剎車夾器的調整螺絲。

- ▶ This POP ("Point of Power") casing end cap is specifically designed to maximize brake cable power transmission on all designs of linear pull brakes. Please be sure to install it securely into the large end of brake's guide tube.

請注意：使用直絲結構的剎車外殼導管，需搭配POP端套並組裝在剎車夾器的調整螺絲上，以防止外殼導管穿出。

7. Adjust brakes and tighten anchor bolt to recommended torque specifications.

將剎車內線穿過夾器調整螺絲後，鎖固於螺絲上面。
(螺絲的鎖緊扭力請參考剎車夾器原廠組裝說明)

8. Cut off excess inner cable and crimp the cable tip.

將多餘的剎車內線剪斷後，套上剎車內線專用線尾帽，並夾緊防止脫落。

General Safety Information 重要安全資訊

⚠ WARNING 警告

- ▶ This manual is intended primarily for use by professional bicycle mechanics.
- ▶ Users who are not professionally trained for bicycle assembly should not attempt to install the components themselves. Instead, contact your place of purchase or a local bicycle dealer for their assistance.
- ▶ Improper adjustment or service may result in damage to the bicycle or an accident, which can cause serious injury or death.

- ▶ 本使用者說明書供專業且有經驗的自行車技師參考。
- ▶ 若本身尚未向技師或經銷商學會正確的維修方法前，切勿擅自隨意對自行車進行任何調整或保養的動作。故在自行車上安裝零配件前，請先向車店技師或零售車店商進行確認。
- ▶ 使用錯誤的調整或保養，將可能引起自行車的損壞或事故發生，甚至導致嚴重傷亡事故發生。
